BETSSON LAUNCHES POKER FOR MOBILE PHONES

Betsson launches a poker client for mobile phones. This means that players have increased accessibility to an already popular service. Through a mobile phone, players can play at the same poker table as thousands of other players playing from their computer.

"Betsson is now able to let their players play Texas Hold'em Poker from their garden, boat, the airport or practically anywhere they want" says Betsson's media spokesman Martin Bunge-Meyer.
